SKILLS

Programming Languages
• JavaScript • Java
Tool and Technologies
• Git • React • Node • Core Java • J2EE • MongoDB • SQL • BlockChain • Solidity • Express

EXPERIENCE

WIPRO | Project Engineer
Jun 2022 - Present | New York, NY

- Made contributions in the field of Blockchain Technology
- Got to work on the public blockchain
- Full-stack developer - Developed backend (Node JS), frontend (React JS) and write the smart contract using Solidity.

PROJECTS

SUPPLY CHAIN LEDGER | Full Stack Blockchain Application
Created an application which Uses NodeJs and Express as it's backend and uses React as it's frontend. This project implements the Power of Blockchain by storing the transactions on the Test Network.

BILL PRINTING APPLICATION | Full Stack MERN project
Created an MERN application which calculates the bill of the Jeweller store. And stores the data of the sales which could be later used to know the profit and loss made during a particular months.
